DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

2. Claims 1-10 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach, disclose, or suggest either alone or in combination the silicon controlled rectifier comprising the combination of limitations claimed. The prior art fails to teach a first conducting-type substrate having two second conducting-type deep wells therein, a gate above the substrate and between the deep wells, a source and drain in the deep wells at opposite sides of the gate, a first conducting-type doped region inside the substrate and the floating region as claimed that is located in one of the deep wells and adjacent the first source/drain that is floating when driving the silicon controlled rectifier.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
